DETAILED ACTION

Election/Restrictions

This application contains claims directed to the following patentably distinct species:

Group I (Claims 1-26) corresponding to Figures 1-7, classified in class 725, subclass 81.

Group II (Claims 27-30) corresponding to Figures 11-12, classified in class 463, subclass 40.

The species are independent or distinct because:

Group I corresponds to a receiver that processes embedded data in a television signal and transmits the embedded data wirelessly to a terminal.

Group II corresponds to a network game method and system.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations

Art Unit: 2623

of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species.

MPEP § 809.02(a).
